

# Logging of all your communications

# Making sense of your comms history

All your emails, phone calls, WhatsApps, text messages and online meetings in one secure place.

# **How ComLog Works**

## Consolidate

- Consolidate all your emails + texts + calls in one place.
- > Consolidate conversations.
- Consolidated address book of contacts + organisations.

## **Retrieve**

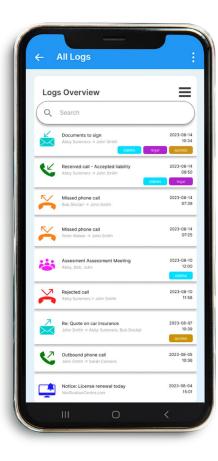

- Easily search your entire communications history.
- Never forget that you sent a previous communication, no matter the medium.
- > Deep filters and sorts.
- Retrieve communications from defunct or deactivated accounts.

# **Prepare**

- Better than TrueCaller for receiving calls.
- Use previous comms from your entire sales team to prepare for a call with a client.
- Use previous comms from anyone in your organisation to prepare for a call with investors or execs.
- Be more prepared for calls with suppliers, complaints, management, or other stakeholders.

# Manage

 Summarised view of your team's communications with customers + suppliers + stakeholders.

- Improve the effectiveness and professionalism of each communicator
- Increase overall efficiency of the team's communication.
- Manage communication procedures, e.g., dunning, approvals, regular contacts.

- Manage metrics for contacts + calls + meetings + follow-ups.
- > Manage response times.
- > Pick up gaps in communicating.

#### **Automate**

- Automated logging does not require you to manually update a system.
- Automated backup of all communications.

#### Prove

- Audit trail proves communications history.
- > Untamperable, encrypted, ringfenced
- > Record phone calls.
- Record, transcribe and generate Al summaries of meetings.
- Never lose any communication history, even if your email or phone number no longer exists.
- Never lose a contact, even if your email or phone number no longer exists.
- Keep all communications by your team, even if people leave the team.

## Integrate

- > Works with your existing CRM.
- > Plugs gaps in your CRM's data.
- Levels the playing field if you're dealing with a company that has a more sophisticated CRM.
